"Karen, thank you for your advice and assistance with my storytelling. Your encouragement, enthusiasm, humor and excellent suggestions helped me to learn new techniques, hone stories I had been using and develop new ideas for future programs. I liked that you were willing to work with me by telephone and found that process easy to fit into my schedule. At first I thought we'd have to do this face-to-face but learned differently. Thank you for your expert tutoring."

David Kushner, President
The Kushner Companies

"I have had the good fortune to work with Karen Dietz in several capacities and have found her to be professional, insightful, and enjoyable to work with. She is also a gifted presenter and storyteller. Having had the good fortune to work with Karen, I witnessed first-hand the depth of her skill, knowledge and her passion for her work. And it doesn't hurt that she knows how to have a good laugh when things get tough, as they inevitably do. I hope to have the opportunity to work with Karen again and unreservedly recommend her." **Paula T. Bartholome**, CEO, Parallax

"Organizations are challenged to think systemically in the Information Age and Karen Dietz is a natural systems thinker. Combine that with her knowledge of organizational dynamics and her understanding of how story transforms and inspires folks and you have a valuable package. I love working with her because she is eager to learn from others and embraces the opportunity to synergize always with a focus on getting result." **Molly Catron**, Keynote speaker, organizational consultant
